1. Getting Started

1.1 App Overview

Personal Finance Manager is a mobile application designed to help you manage your personal finances efficiently. The app provides a comprehensive suite of tools for tracking bank account balances, recording deposits and withdrawals, managing credit card bills, importing/exporting data, and keeping track of pending payments — all from your smartphone.

1.2 Installation

The app is available as an Android APK. To install it on your device:

1. Download the APK file provided to you.
2. On your Android device, go to **Settings** → **Security** and enable **Install from Unknown Sources** (if not already enabled).
3. Open the downloaded APK file and tap **Install**.
4. Once installed, tap **Open** to launch the app.

1.3 Key Features

Multi-Account Support

Track multiple bank accounts simultaneously with real-time balance calculations.

Transaction Tracking

Record deposits and withdrawals with reasons, filtered by day, month, or year.

Credit Card Management

Track credit card bills with partial payments, minimum due, and overdue detection.

Pending Payments

Keep track of upcoming payments, loans, and bills with due date tracking.

Smart Insights

Data-driven financial insights with budget tracking, spending trends, and progress bars.

Import & Export

Import transactions from CSV, TXT, JSON, or Excel files. Export data as Excel spreadsheets.

Smart Notifications

Get priority-based alerts for overdue bills and upcoming payments.

Data Privacy

All your financial data is stored locally on your device for maximum privacy.

1.4 What's New in v1.0.0.7

This release includes several major new features and improvements:

- **Quick Deposit & Cost Popup** — Tap Deposit or Cost buttons on the dashboard to open a quick popup for fast entries without leaving the home screen. Long-press to open the full page.
- **Default Account Selection** — Choose a default bank/MFS account for deposits and costs during sign-up (Step 4) or update anytime in Profile settings. Quick actions auto-select your default account.
- **Credit Card Bill Paid** — Each credit card transaction now has a "Bill Paid" button that deducts the transaction amount from the pending credit card bill balance.
- **Improved Button Layout** — Import button is now smaller and positioned at the top-right. Deposit and Cost buttons are larger and more prominent.
- **What's New Auto-Popup** — Existing users who update the app see a "What's New" popup on first launch showing new features.
- **Deposit Reason & Categories** — Add a reason/source when making deposits, with quick category chips (Salary, Freelance, Gift, etc.).
- **Budget Settings** — Set default monthly cost and deposit targets during sign-up or from the Profile screen.
- **Edit Credit Card Bills** — Edit the amount of pending credit card bills.
- **Partial & Minimum Payments** — Make partial credit card bill payments and track minimum due amounts.
- **Import Data** — Import transactions from CSV, TXT, JSON, or Excel files with auto column mapping.
- **Export Data** — Export your transactions as Excel spreadsheets (daily, monthly, yearly, or all time).
- **Enhanced Insights** — 10+ data-driven insights including budget/income tracking, month-over-month comparison, spending trends, and more.
- **Words of Wisdom** — Inspirational quotes about money and Islamic savings on the Dashboard.
- **Home Screen Widgets** — Two Android home screen widgets: Quick Actions (Deposit/Cost buttons) and Balance (account balances at a glance).
- **Version & Release Notes** — View the app version and what's new from the Profile screen.

2. Account Setup

2.1 Creating an Account

When you first open the app, you'll need to create an account. The sign-up process has four steps.

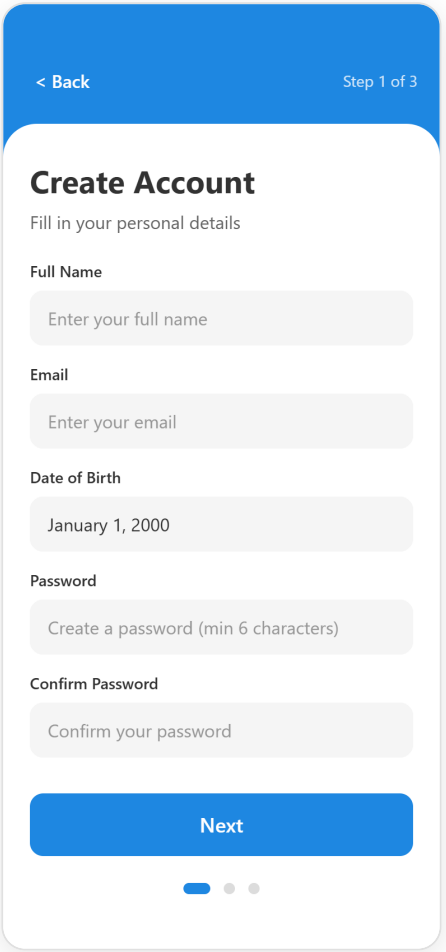

Figure 2.1 — Sign Up: Step 1 of 4 (Personal Details)

Step 1: Personal Details

1. From the Login screen, tap **"Sign Up"** at the bottom.
2. Enter your **Full Name**.
3. Enter your **Email** address.
4. Select your **Date of Birth** using the date picker.

5. Create a **Password** (minimum 6 characters).
6. Re-enter your password in the **Confirm Password** field.
7. Tap **"Next"** to proceed to Step 2.

Step 2: Bank Accounts

1. Enter the **number of bank accounts** you want to add.
2. For each account, enter the **bank name** (e.g., DBBL, Brac Bank, City Bank).
3. Tap **"Next"** to proceed to Step 3.

> **TIP**
> You can always add more bank accounts later from the Profile screen. Add at least one account during sign-up to start tracking your finances right away.

Step 3: Credit Cards (Optional)

1. Toggle the switch if you have credit cards.
2. If yes, enter the **number of credit cards**.
3. For each card, provide the **Bank Name**, **Bill Generation Day** (1-31), and **Last Payment Day** (1-31).
4. Tap **"Next"** to proceed to Step 4.

> **NOTE**
> The Bill Generation Day is when your credit card statement is generated each month. The Last Payment Day is the deadline to pay your bill to avoid late fees.

Step 4: Budget Settings & Default Accounts (Optional)

1. Enter your **Default Monthly Cost** — the amount you typically spend per month. This is used for budget tracking in Insights.

2. Enter your **Default Monthly Deposit** — the amount you typically earn/receive per month. This is used for income tracking in Insights.
3. **Default Deposit Account** — Select which bank or MFS account to use by default when making quick deposits from the dashboard.
4. **Default Cost Account** — Select which bank or MFS account to use by default when recording quick expenses from the dashboard.
5. All fields are optional. You can skip this step by tapping **"Skip"**.
6. Tap **"Create Account"** to complete registration.

> **TIP**
>
> Setting budget values and default accounts during sign-up enables budget tracking in Insights and faster quick entries from the Dashboard. You can always update these later from the Profile screen.

2.2 Signing In

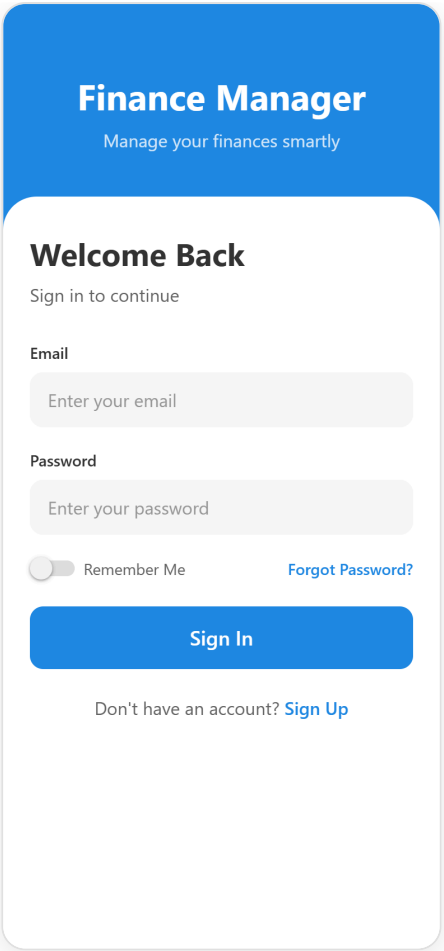

Figure 2.2 — Login Screen

To sign in to your account:

1. Enter your registered **Email** address.
2. Enter your **Password**.
3. Optionally, toggle **"Remember Me"** to save your credentials for next time.
4. Tap **"Sign In"** to access your dashboard.

> **TIP**
>
> Enable "Remember Me" to skip entering your credentials each time you open the app. Your email and password will be securely saved on your device.

2.3 Resetting Your Password

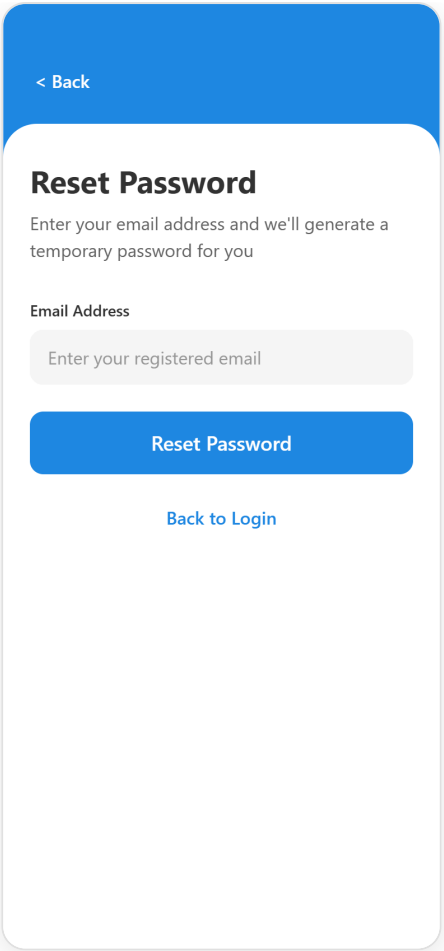

Figure 2.3 — Reset Password Screen

If you've forgotten your password:

1. On the Login screen, tap **"Forgot Password?"**.
2. Enter your registered **Email Address**.
3. Tap **"Reset Password"**.
4. A temporary password will be displayed on screen. **Note it down carefully.**
5. Use the temporary password to log in.
6. After logging in, you will be prompted to **set a new password**.

> **IMPORTANT**
>
> The temporary password is shown only once. Make sure to note it down before navigating away from the screen.

3. Dashboard

3.1 Dashboard Overview

The Dashboard is your financial command center. It gives you an at-a-glance view of your total balance, recent activity, account balances, financial insights, inspirational quotes, and any pending items that need your attention.

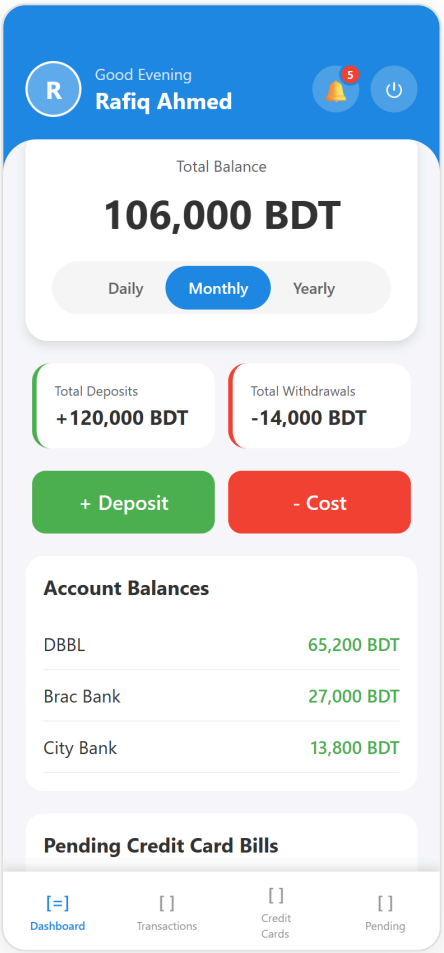

Figure 3.1 — Dashboard Overview

The Dashboard is organized into the following sections:

Section	Description
Header	Shows your profile avatar, greeting (changes based on time of day), notification bell, and logout arrow button.
Total Balance	Displays the combined balance across all your bank accounts in BDT.
Period Filter	Switch between *Daily*, *Monthly*, and *Yearly* views for deposit/withdrawal summaries.
Summary Cards	Vertically stacked rows showing total deposits (green), total withdrawals (red), and credit card costs (orange) for the selected period.
Import Button	Small orange "*Import*" button at the top-right for importing data files.
Quick Actions	Large green "+ *Deposit*" and red "- *Cost*" buttons. Tap for a quick popup entry; long-press to open the full page.
Export	An "Export Transactions as Excel" button to export your data.
Account Balances	Lists each bank account with its current balance.
Financial Insights	Data-driven insights about your spending, budget, and trends (see Section 3.5).
Words of Wisdom	Inspirational quotes about money and Islamic savings (see Section 3.6).
Pending Bills	Shows pending or overdue credit card bills.
Pending Payments	Shows upcoming payments and overdue items.

3.2 Balance & Summary

The total balance at the top is automatically calculated from all your bank account transactions. Use the filter buttons to view your income and expenses for different time periods:

- **Daily** — Shows transactions from today only.
- **Monthly** — Shows transactions from the current month.
- **Yearly** — Shows transactions from the current year.

The summary cards are displayed as vertically stacked rows below the period filter. Each row has a colored left border, an icon badge, the category label on the left, and the amount (in BDT) on the right.

Card	Icon	Color	What It Includes
Total Deposits	+	Green	All incoming money (salary, transfers, etc.).
Total Withdrawals	-	Red	Bank account expenses, credit card bill payments, and other outgoing money.
Credit Card Costs	C	Orange	Expenses charged to a credit card (only visible if you have credit cards).

> **NOTE**
>
> Credit card costs are tracked separately from withdrawals. When you pay off a credit card bill from a bank account, that payment appears under **Total Withdrawals**. When you charge an expense to a credit card, it appears under **Credit Card Costs**.

3.3 Notifications

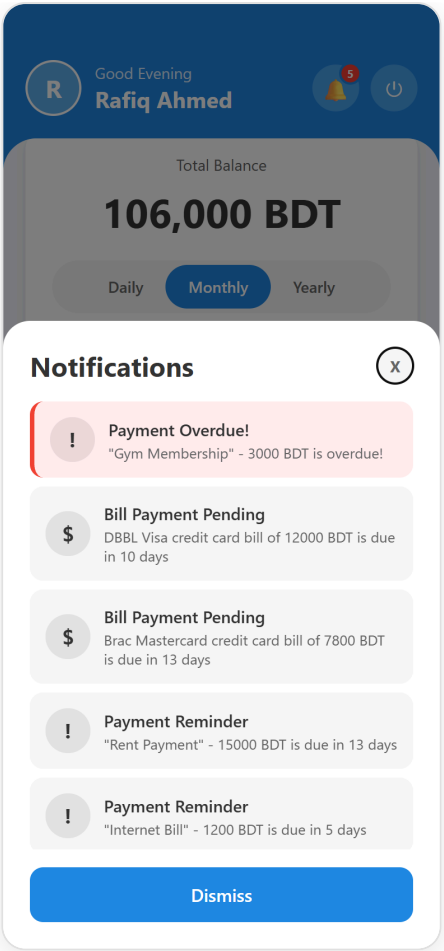

Figure 3.2 — Notifications Panel

The notification bell in the top-right corner shows a red badge with the count of active alerts. Tap it to open the Notifications panel. Notifications are automatically generated for:

- **Overdue payments** — Highlighted in red (urgent priority).
- **Pending bill payments** — Shows days remaining until due.
- **Upcoming payment reminders** — For pending items nearing their due date.

> **TIP**
>
> Check your notifications regularly to stay on top of upcoming bills and avoid late fees. Notifications are sorted by urgency, with the most critical ones at the top. Bills with only the minimum paid will continue to appear in notifications until fully paid.

3.4 Quick Actions

The dashboard features a quick entry system for recording transactions without leaving the home screen:

- **Import** (small button, top-right) — Navigate to the Import Data screen to import transactions from a file.
- **+ Deposit** — Tap to open a quick popup where you can select an account, enter an amount and reason, and submit instantly. Long-press to open the full Deposit page.
- **- Cost** — Tap to open a quick popup for recording expenses. Long-press to open the full Cost/Withdrawal page.

Quick Action Popup: The popup lets you:

- Select from your bank/MFS accounts (your default account is pre-selected if configured)
- Enter the amount
- Add an optional reason
- Tap "Open Full Page" at the bottom to switch to the detailed entry screen

Below the quick actions, you'll find the **"Export Transactions as Excel"** button that lets you export your transaction data as a downloadable Excel file (see Chapter 9).

> **TIP**
> Pull down on the dashboard to refresh all data and recalculate balances. Set your default accounts in Profile to speed up quick entries.

3.5 Financial Insights

The Financial Insights section on the Dashboard provides data-driven analysis of your spending patterns and financial health. Insights are refreshed automatically when you open the Dashboard.

The following types of insights are available:

Insight	Description
Budget Tracking	If you've set a default monthly cost, shows a progress bar indicating how much of your monthly budget you've used. Turns red when exceeded.
Income Tracking	If you've set a default monthly deposit, shows a progress bar for how much of your expected income you've received.
Month-over-Month	Compares your spending this month to last month with trend arrows (up/down).
Daily Average Spending	Shows your average daily spending for the current month.
Biggest Expense	Highlights your single largest expense this month.
Most Frequent Category	Identifies the spending category you use most often.
Projected Balance	Estimates your month-end balance based on current spending rate.
Pending CC Bills	Alerts you to upcoming credit card bill due dates.
Weekend vs Weekday	Compares your weekend spending to weekday spending.
Spending Trend	Shows whether your spending is increasing or decreasing with directional arrows.

Additionally, generic financial tips are shown below the data-driven insights, covering topics like savings rate, the 50/30/20 rule, emergency funds, and investment.

> **TIP**
> Set your default monthly cost and deposit from the Profile screen (see Section 10.2) to unlock budget and income tracking progress bars in Insights.

3.6 Words of Wisdom

Below the Financial Insights section, you'll find the **"Words of Wisdom"** section featuring inspirational quotes about money management and Islamic savings.

- A **random quote** is displayed each time you open the Dashboard.

- Tap **"New Quote"** to see a different quote.
- Each quote has a category badge: **Islamic** (green) or **Finance** (blue).
- Tap **"View All Quotes"** to expand and see all available quotes.

Quotes include wisdom from the Quran, Hadith, and famous financial thinkers like Warren Buffett, Benjamin Franklin, and Dave Ramsey.

4. Deposits

4.1 Making a Deposit

Record incoming money (salary, transfers, etc.) through the Deposit screen.

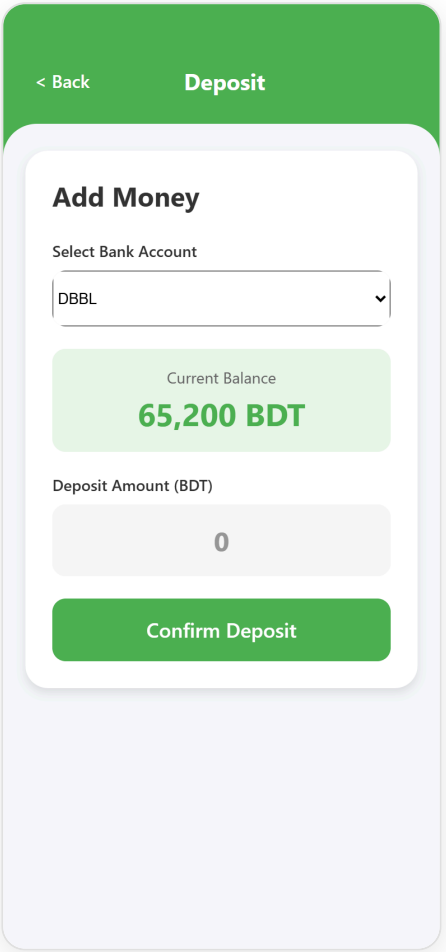

Figure 4.1 — Deposit Screen

1. From the Dashboard, tap the green **"+ Deposit"** button.
2. Select the **Bank Account** where the money is being deposited using the dropdown.
3. The **Current Balance** for the selected account is displayed in green.
4. Enter the **Deposit Amount** in BDT.
5. Enter a **Reason / Source** for the deposit (see Section 4.2).

6. A **New Balance** preview will appear showing the updated balance after the deposit.
7. Tap **"Confirm Deposit"** to record the transaction.
8. A success message will appear. Tap **"OK"** to return to the Dashboard.

4.2 Deposit Reason & Categories

When making a deposit, you can specify the reason or source of the income. This helps you track where your money is coming from.

- Enter a custom reason in the **"Reason / Source"** text field.
- Or tap one of the **Quick Category** chips to auto-fill the reason:

Category	Use For
Salary	Monthly salary or wages
Freelance	Freelance or contract income
Gift	Gifts or monetary presents
Investment Return	Returns from investments
Refund	Refunds from purchases
Other	Any other source of income

> **TIP**
> Adding a reason to your deposits helps the Financial Insights feature identify your most frequent income sources and provide better analysis.

> **NOTE**
> The deposit reason is optional. The deposit amount must be a valid number greater than zero. The new balance is previewed in real-time as you type.

5. Withdrawals & Expenses

5.1 Recording an Expense

Track your spending by recording expenses through the Cost / Withdrawal screen.

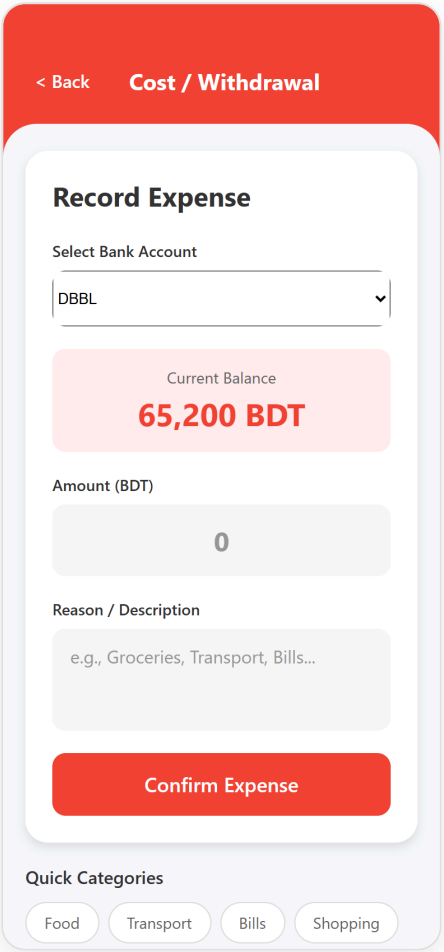

Figure 5.1 — Cost / Withdrawal Screen

1. From the Dashboard, tap the red **"- Cost"** button.
2. Select an account from the **"Select Account"** dropdown. The picker shows both **Bank Accounts** and **Credit Cards**, separated by section headers.
3. If a bank account is selected, the **Current Balance** is shown in red. If a credit card is selected, no balance is displayed.
4. Enter the **Amount** in BDT.

5. Enter a **Reason / Description** for the expense (e.g., "Groceries", "Transport").
6. Alternatively, tap a **Quick Category** button to auto-fill the reason.
7. If a bank account is selected and you enter an amount, a **New Balance** preview appears.
8. Tap **"Confirm Expense"** to record the transaction.

5.2 Credit Card Expenses

You can record expenses made on a credit card directly from the Cost screen. This is separate from credit card *bill payments*.

- **Credit cards appear in the account picker** — labeled as "*BankName (Credit Card)*" under a "Credit Cards" section header.
- **No balance impact** — Credit card expenses do not affect any bank account balance. They are tracked separately as spending on that card.
- **View on Credit Cards screen** — All expenses recorded against a credit card appear in the collapsible **"Transactions"** section on the Credit Cards screen (see Section 7.6).
- **Shown separately on Dashboard** — Credit card expenses appear under the **"Credit Card Costs"** summary card (orange) on the Dashboard.

5.3 Quick Categories

At the bottom of the Withdrawal screen, you'll find Quick Category buttons for common expense types:

Category	Use For
Food	Groceries, restaurants, dining out
Transport	Ride-shares, fuel, public transport
Bills	Utility bills, subscriptions
Shopping	Clothing, electronics, household items
Entertainment	Movies, games, outings
Healthcare	Medicine, doctor visits, insurance

WARNING

If the withdrawal amount exceeds your current balance, the New Balance preview will turn red to warn you that the account will go into a negative balance. You can still proceed, but please review carefully.

6. Transactions

6.1 Viewing Transactions

The Transactions screen provides a complete history of all your deposits and withdrawals, organized by date.

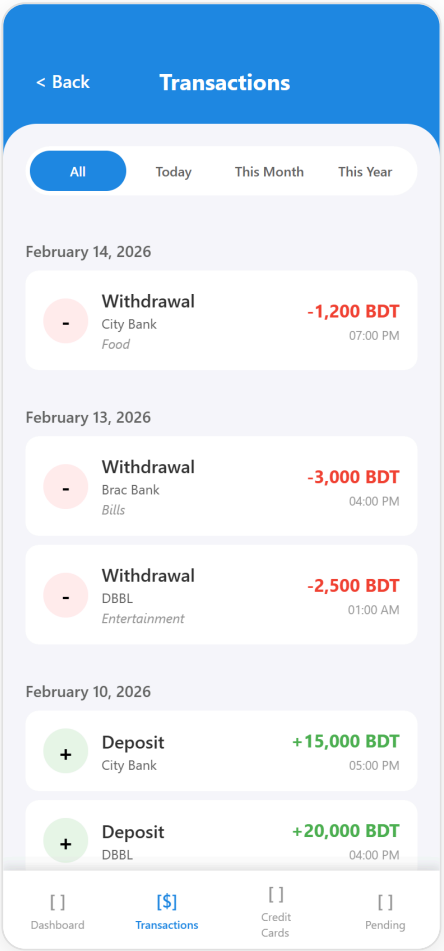

Figure 6.1 — Transactions Screen

Each transaction entry shows:

- **Transaction Type** — + Deposit (green) or - Withdrawal (red).
- **Account** — Which bank account or credit card was used. Credit card transactions display as "*CardName (CC)*".
- **Reason** — The description/category for the transaction.
- **Amount** — Color-coded: green for deposits, red for withdrawals.
- **Time** — When the transaction was recorded.

Transactions are grouped by date with the most recent shown first.

6.2 Filtering Transactions

Use the filter tabs at the top of the screen to narrow down your view:

Filter	Shows
All	Every transaction ever recorded
Today	Transactions from today only
This Month	Transactions from the current month
This Year	Transactions from the current year

> **TIP**
>
> Pull down on the Transactions screen to refresh and load the latest transactions.

6.3 Editing a Transaction

Every transaction card has visible **"Edit"** and **"Remove"** buttons at the bottom. You can modify any transaction's details after it has been recorded.

1. Find the transaction you want to edit in the transaction list.
2. Tap the blue **"Edit"** button at the bottom of the transaction card.
3. The Edit Transaction modal will open with all the current details pre-filled.
4. Modify any of the following fields:
    - 5 **Type** — Toggle between Deposit and Withdrawal.
    - 6 **Account** — Change which bank account this transaction belongs to.
    - 7 **Amount (BDT)** — Update the transaction amount.
    - 8 **Date** — Change the transaction date in `YYYY-MM-DD` format.
    - 9 **Reason** — Update the description or reason.
10. Tap **"Save"** to apply your changes, or **"Cancel"** to discard them.

NOTE

Editing a transaction will immediately update your account balances and transaction summaries. The change is reflected everywhere in the app, including the Dashboard totals.

6.4 Removing a Transaction

You can permanently delete any transaction that was recorded incorrectly or is no longer needed.

1. Find the transaction you want to remove in the transaction list.
2. Tap the red **"Remove"** button at the bottom of the transaction card.
3. A confirmation dialog will appear showing the transaction type and amount.
4. Tap **"Delete"** to permanently remove the transaction, or **"Cancel"** to keep it.

CAUTION

Removing a transaction is permanent and cannot be undone. The deletion will immediately affect your account balance and all summary calculations.

7. Credit Cards

7.1 Managing Credit Cards

The Credit Cards screen helps you keep track of all your credit card bills, payment history, and expenses made on each card. Navigate to this screen by tapping the **"Credit Cards"** tab in the bottom navigation bar.

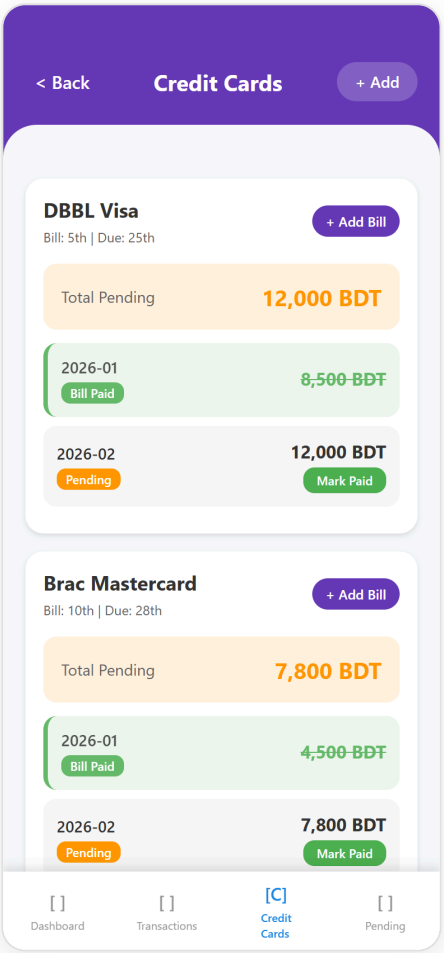

Figure 7.1 — Credit Cards Screen

The screen is organized as follows:

- **Total CC Spending** — A red-tinted summary card at the top showing the total amount spent across all credit cards.
- **Per-Card Sections** — Each credit card has its own card showing the bank name, bill/due dates, pending bills, payment history, and transactions.

Each credit card displays:

- **Bank Name** — The name of the credit card (e.g., "DBBL Visa").
- **Bill Date | Due Date** — When your statement is generated and when payment is due.
- **Total Pending** — The total amount of unpaid bills.
- **Active Bills** — Pending and Overdue bills with action buttons (Mark Paid, Edit, Pay Minimum).
- **Payment History** — Collapsible section showing previously paid bills.
- **Transactions** — Collapsible section showing expenses made on this card.

7.2 Tracking Bills

Bills have three possible statuses:

Status	Color	Meaning
Paid	Green	The bill has been fully paid. Moved to Payment History section.
Pending	Orange	The bill is due but hasn't been fully paid yet.
Overdue	Red	The payment date has passed and the bill is still unpaid or partially paid.

Active bills (Pending and Overdue) are shown prominently at the top of each card. Each active bill displays its amount, status, and any partial payment progress. If a minimum due amount was set, it is displayed below the bill amount.

7.3 Editing a Bill

You can edit the amount of any active (Pending or Overdue) bill:

1. Find the active bill you want to edit on the Credit Cards screen.
2. Tap the **"Edit"** button next to the bill.
3. The Edit Bill modal will open with the current bill amount pre-filled.
4. Enter the new **Bill Amount**.
5. Tap **"Save"** to update the amount, or **"Cancel"** to discard changes.

> **TIP**
> Use the Edit feature when your credit card statement amount changes due to returns, adjustments, or corrections.

7.4 Partial & Minimum Payments

The app supports flexible payment options for credit card bills:

Full Payment

1. Tap **"Mark Paid"** on the bill you want to pay.
2. The payment mode defaults to **"Full Payment"**.
3. Select the **bank account** from which to deduct the payment.
4. Tap **"Confirm Payment"** to pay the full bill amount.

Partial Payment

1. Tap **"Mark Paid"** on the bill.
2. Switch the payment mode to **"Partial Payment"**.
3. Enter the **partial amount** you want to pay.
4. Toggle **"Deduct from main bill?"** to choose whether the partial payment should reduce the outstanding bill amount or just be recorded as a transaction.
5. Select the **bank account** for the payment.
6. Tap **"Confirm Payment"** to process.

Minimum Due Payment

If a minimum due amount was set when the bill was created, a **"Pay Minimum"** button appears on the bill. Tapping it pre-fills the partial payment amount with the minimum due value.

> **IMPORTANT**
>
> Paying only the minimum due does **not** mark the bill as fully paid. The bill will remain in Pending or Overdue status, and notifications will continue until the full amount is paid.

When partial payments have been made on a bill, the display shows:

- The original bill amount
- The amount paid so far (in green)
- The remaining balance

> **NOTE**
>
> When the "Deduct from main bill?" toggle is ON, partial payments reduce the outstanding bill amount. When it reaches zero, the bill is automatically marked as Paid. When the toggle is OFF, the payment is recorded as a transaction but the bill amount remains unchanged.

7.5 Payment History

Paid bills are separated from active bills into a collapsible **"Payment History"** section. This keeps the card view clean while still providing access to your bill payment records.

- Tap **"Payment History (N)"** to expand or collapse the section.
- Each paid bill shows the **bill month**, a green **"Paid"** badge, the **payment date**, and the **amount** with strikethrough styling.

7.6 Credit Card Transactions

Each credit card shows a collapsible **"Transactions (N)"** section listing all expenses recorded against that card from the Cost screen (see Section 5.2).

- Tap **"Transactions (N)"** to expand or collapse the list.
- Each transaction shows the **reason/description**, **date**, and **amount** in red.
- These transactions are also visible on the main Transactions screen (Section 6), where they display the credit card name with a "(CC)" suffix.
- **"Bill Paid" Button** — Each transaction that hasn't been marked yet shows a green "Bill Paid" button. Tapping it deducts the transaction amount from the card's most recent pending bill. Once the bill is fully paid (total deductions meet or exceed bill amount), the bill is automatically marked as "Paid". Transactions already marked show a "Bill Paid" badge.

7.7 Adding Cards & Bills

Adding a New Credit Card

1. Tap **"+ Add"** in the top-right corner of the Credit Cards screen.
2. Enter the **Bank Name** (e.g., "DBBL Visa").
3. Select the **Bill Generation Day** (the day of the month your statement is generated).
4. Select the **Last Payment Day** (the deadline for payment).
5. Tap **"Add Card"** to save.

Adding a New Bill

1. On the desired credit card, tap **"+ Add Bill"**.
2. Enter the **Bill Amount** in BDT.
3. Optionally, enter the **Minimum Due** amount — the minimum payment required to avoid late fees.
4. Tap **"Add Bill"** to save.

> **TIP**
>
> Add your credit card bills as soon as you receive your statement. Include the minimum due amount so you can quickly make minimum payments when needed. The app will keep notifying you until the full bill is paid.

8. Pending Items

8.1 Managing Pending Items

The Pending Items screen helps you track upcoming payments, loans, and any other financial obligations. Navigate here by tapping the **"Pending"** tab in the bottom navigation bar.

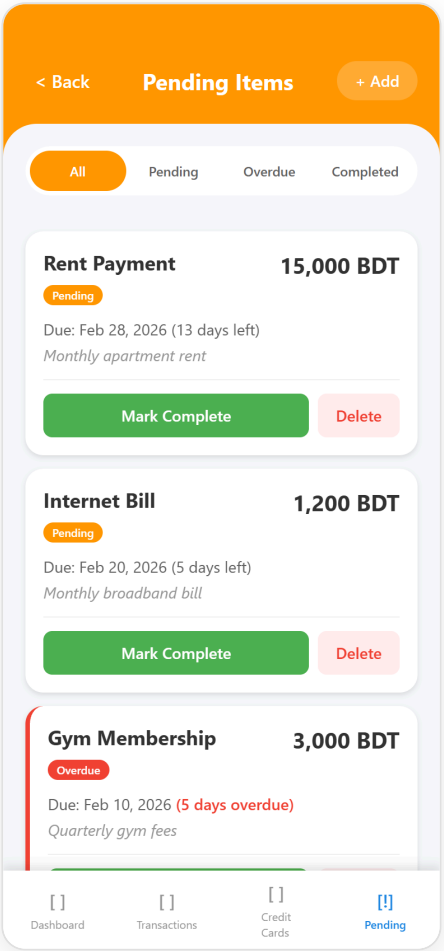

Figure 8.1 — Pending Items Screen

Each pending item shows:

- **Title** — Name of the payment or obligation.
- **Status Badge** — Color-coded: Pending (orange), Overdue (red), or Completed (green).
- **Amount** — The amount due in BDT.
- **Due Date** — When the payment is due.
- **Days Remaining** — How many days until (or since) the due date.
- **Description** — Optional additional details.

Filter pending items using the tabs at the top:

Filter	Shows
All	All pending items regardless of status
Pending	Only items that are still pending
Overdue	Only items past their due date
Completed	Only items marked as complete

8.2 Adding Pending Items

1. Tap **"+ Add"** in the top-right corner.
2. Enter a **Title** (e.g., "Rent Payment", "Internet Bill").
3. Enter the **Amount** in BDT.
4. Select the **Due Date** using the date picker.
5. Optionally, add a **Description** for more details.
6. Tap **"Add Item"** to save.

8.3 Editing Pending Items

You can edit any pending or overdue item to update its details.

1. Find the pending item you want to edit in the list.
2. Tap the orange **"Edit"** button on the item card.
3. The Edit Pending Item modal will open with all current details pre-filled.
4. Modify any of the fields as needed.
5. Tap **"Save Changes"** to apply your edits, or **"Cancel"** to discard them.

8.4 Status Management

Each pending item has action buttons to manage its status:

- **Mark Complete** — Tap to mark an item as paid/completed.
- **Edit** — Tap to modify the item's details (see Section 8.3).
- **Delete** — Tap to permanently remove an item.

> **IMPORTANT**
>
> Items that pass their due date are automatically marked as "Overdue" and highlighted with a red border. Keep track of overdue items to avoid financial penalties.

9. Import & Export Data

9.1 Importing Transactions

The Import Data feature lets you bulk-import transactions from external files into the app. This is useful for migrating data from other finance apps or spreadsheets.

Supported File Formats

Format	Extension	Description
CSV	.csv	Comma-separated values. The most common format for spreadsheet exports.
Text	.txt	Tab, comma, semicolon, or pipe-delimited text files. The delimiter is auto-detected.
JSON	.json	JSON array of transaction objects, or an object with a `transactions` key.
Excel	.xlsx, .xls	Microsoft Excel spreadsheet files.

Import Steps

1. From the Dashboard, tap the orange **"Import"** button.
2. Tap **"Pick a File"** and select a CSV, TXT, JSON, or Excel file from your device.
3. The app will parse the file and display the detected columns with a preview of the first 5 rows.
4. **Map the columns**: The app auto-detects common column names (type, amount, reason, date). You can manually adjust the mapping using the dropdown pickers if needed.
5. Select the **bank account** to assign the imported transactions to.
6. Review the preview and tap **"Import Transactions"** to complete the import.
7. A success message will confirm how many transactions were imported.

TIP

For best results, ensure your file has headers like "type", "amount", "reason", and "date". The auto-mapping feature recognizes many common aliases (e.g., "description" for "reason", "category" for "reason", "value" for "amount").

NOTE

The "type" column should contain values like "deposit", "income", "credit" (for deposits) or "withdrawal", "expense", "debit", "cost" (for withdrawals). If the type is not recognized, the transaction defaults to "withdrawal".

9.2 Exporting Transactions

Export your transaction data as an Excel spreadsheet for backup or analysis in other tools.

1. On the Dashboard, tap the **"Export Transactions as Excel"** button.
2. A modal will appear with export options:

Option	Exports
Today	Only today's transactions
This Month	Transactions from the current month
This Year	Transactions from the current year
All Time	Every transaction ever recorded

3. Tap your desired option. The app will generate an Excel file.
4. The system share dialog will open, allowing you to save the file, send it via WhatsApp, email, or any other sharing method.

The exported Excel file includes the following columns:

- **Date** — Transaction date
- **Type** — Deposit or Withdrawal
- **Amount** — Transaction amount in BDT
- **Reason** — Description/category
- **Account** — Bank account or credit card name

TIP

Export your data monthly to keep a backup. Since all data is stored locally on your device, regular exports ensure you don't lose your records if the app is uninstalled.

10. Profile & Settings

10.1 Profile Management

Access your profile by tapping on your **profile avatar** (the circle with your initials) in the top-left corner of the Dashboard.

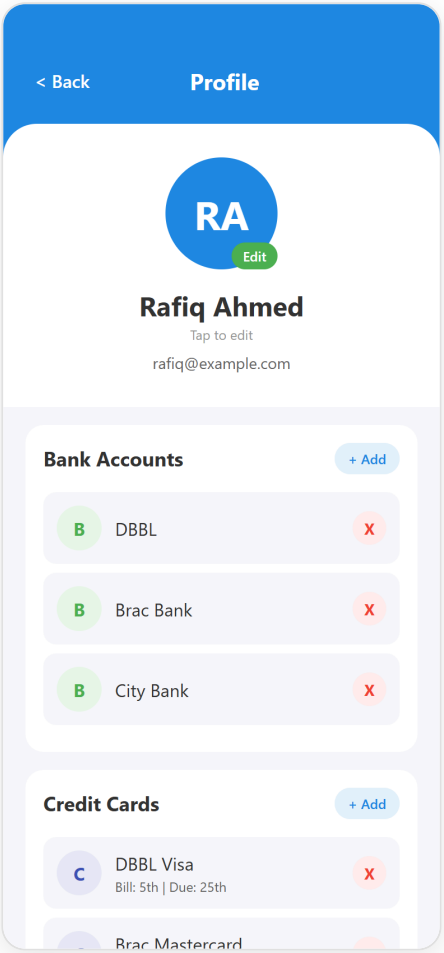

Figure 10.1 — Profile Screen

From the Profile screen, you can:

- **Change Profile Picture** — Tap the "Edit" badge on your avatar to select a photo from your gallery.
- **Edit Your Name** — Tap on your name (where it says "Tap to edit") to open the name editing dialog.
- **View Your Email** — Your registered email is displayed below your name.

10.2 Budget Settings

The Budget Settings section on the Profile screen lets you set or update your default monthly financial targets. These values power the budget and income tracking features in Financial Insights.

- **Default Monthly Cost** — Your expected monthly spending amount. When set, the Insights section will show a budget usage progress bar.
- **Default Monthly Deposit** — Your expected monthly income amount. When set, the Insights section will show an income tracking progress bar.

1. Scroll to the **"Budget Settings"** section on the Profile screen.
2. Tap the **"Edit"** button.
3. Enter or update your **Default Monthly Cost** and **Default Monthly Deposit** values.
4. Tap **"Save"** to apply the changes.

> **TIP**
>
> These values are optional but highly recommended. Setting them enables powerful budget tracking insights on your Dashboard, helping you stay within your spending limits and track your income goals.

10.2.1 Default Accounts

The **Default Accounts** section (visible when you have bank accounts) lets you choose which accounts are pre-selected when using the quick deposit and cost popups on the Dashboard.

- **Default Deposit Account** — Tap a bank/MFS name to set it as your default for quick deposits. Tap again to deselect.
- **Default Cost Account** — Tap a bank/MFS name to set it as your default for quick expenses. Tap again to deselect.

Changes are saved automatically when you tap an account chip.

10.3 Managing Bank Accounts

The Profile screen also lets you manage your bank accounts and credit cards:

Bank Accounts

- **Add Account** — Tap **"+ Add"** next to "Bank Accounts", enter the bank name, and tap "Add".

- **Delete Account** — Tap the red **"X"** next to any account. Note: Deleting an account also removes all its associated transactions.

Credit Cards

- **Add Card** — Tap **"+ Add"** next to "Credit Cards", fill in the bank name and billing dates, and tap "Add".
- **Delete Card** — Tap the red **"X"** next to any card. This also removes all associated bills and transactions.

> **CAUTION**
>
> Deleting a bank account will permanently remove all transactions associated with that account. Deleting a credit card will also remove all its bill records and any expenses recorded against that card. These actions cannot be undone.

10.4 Version & Release Notes

At the bottom of the Profile screen, you can see the current **app version**. Tap the **"What's New?"** link to open a popup showing the latest features and improvements in the current version.

Automatic Update Popup: When you update the app to a new version, a "What's New" popup automatically appears on the Dashboard showing all new features. This only appears once per version update.

> **NOTE**
>
> The current version is **v1.0.0.7**. Check the release notes to learn about all the new features available to you.

10.5 Data Security

Your financial data is stored entirely on your device using local storage. No data is sent to external servers, ensuring complete privacy and security of your financial information.

> **NOTE**
>
> Since all data is stored locally, uninstalling the app will permanently delete all your financial records. Use the Export feature (Section 9.2) to keep regular backups of your data.

Logging Out

To log out, tap the **red "Logout" button** at the bottom of the Profile screen, or the **arrow icon** in the top-right corner of the Dashboard. A confirmation dialog will appear before you are logged out.

11. Navigation Guide

The app uses a combination of bottom tab navigation and screen-to-screen navigation:

Bottom Navigation Tabs

The bottom of the screen features four main tabs that are always accessible:

Tab	Icon	Screen
Dashboard	[=]	Main dashboard with balance overview, insights, and quick actions
Transactions	[$]	Complete transaction history with filters
Credit Cards	[C]	Credit card management, bill tracking, and partial payments
Pending	[!]	Pending payments and obligations

Screen Navigation Map

From	Action	Goes To
Login	Tap "Sign Up"	Sign Up (Step 1 of 4)
Login	Tap "Forgot Password?"	Reset Password
Login	Tap "Sign In"	Dashboard
Dashboard	Tap profile avatar	Profile
Dashboard	Tap "+ Deposit"	Deposit Screen
Dashboard	Tap "- Cost"	Withdrawal Screen
Dashboard	Tap "Import"	Import Data Screen
Dashboard	Tap notification bell	Notifications (modal)
Dashboard	Tap "Export Transactions"	Export Modal
Any Screen	Tap "< Back"	Previous screen

TIP

The active tab in the bottom navigation bar is highlighted in blue. You can switch between the four main sections at any time by tapping the corresponding tab.

Need Help?

If you encounter any issues or have questions about the app, please contact the app administrator or refer to this manual for guidance.

12. Home Screen Widgets

The app includes two Android home screen widgets that give you quick access to key features without opening the full app.

12.1 Adding Widgets

To add a widget to your home screen:

1. Long-press on an empty area of your Android home screen.
2. Tap **"Widgets"** from the menu that appears.
3. Scroll through the widget list and find **"Finance Manager"**.
4. You will see two widget options: **"Finance - Quick Actions"** and **"Finance - Balance"**.
5. Long-press your desired widget and drag it to your home screen.
6. Resize the widget by dragging its edges if needed.

12.2 Quick Actions Widget

The Quick Actions widget provides two buttons on your home screen:

- **+ Deposit** — Tap to open the app and navigate to the Deposit screen.
- **- Cost** — Tap to open the app and navigate to the Withdrawal screen.

This widget is designed as a compact 3x1 cell widget, perfect for placing at the bottom or top of your home screen for instant access to recording transactions.

12.3 Balance Widget

The Balance widget shows your financial overview at a glance:

- **Total Balance** — Your combined balance across all bank accounts, displayed prominently.
- **Individual Accounts** — Each bank account's name and current balance (up to 5 accounts).
- **Color-coded** — Positive balances are shown in green, negative in red.

The widget automatically refreshes when you open the app or make any transaction. Tapping anywhere on the widget opens the full app.

TIP

The Balance widget updates every 30 minutes automatically, and immediately whenever you make a deposit or record an expense through the app. For the most up-to-date balance, simply tap the widget to open the app.

NOTE

Both widgets require you to be logged in to the app. If you log out and log back in, the widgets will update with your account data on the next refresh.
